

VAISHALI A.

Software Engineer | Python & Backend Developer | BTech IT '26

Email: vaishali240905@gmail.com | Location: Vellore, Tamil Nadu

PROFESSIONAL SUMMARY

Passionate Software Engineer specializing in Python, SQL, and software architecture. Experienced in building static code analysis engines, dependency graphs, relational database modeling, and scalable web applications.

TECHNICAL SKILLS

Languages: Python, SQL, C, HTML5, CSS3, JavaScript

Frameworks & Libraries: Flask, NetworkX, Pandas, AST (Abstract Syntax Trees)

Databases & Tools: MySQL, SQLite, Git, GitHub, VS Code, PyCharm, Postman

Core Competencies: Data Structures & Algorithms, OOP, Database Management Systems, OS

FEATURED PROJECTS

1. Software Change Impact & Risk Analysis Platform (Jan 2026 - Apr 2026)

- Built a Python static code analysis platform parsing AST to construct dependency DAGs.
- Implemented rule-based risk scoring (Low, Medium, High) with 100% impact accuracy.
- Generated automated risk assessment reports for developer code reviews and PR auditing.

2. Workforce Intelligence & Management Platform

- Engineered custom Heap data structure for efficient shift priority scheduling.
- Implemented normalized schema with ACID transaction safety and audit logs.

PRACTICAL SIMULATION EXPERIENCE

Walmart Global Tech - Advanced Software Engineering Simulation (Aug 2025)

- Architected custom Min/Max Heap data structure in Python from scratch.
- Modeled relational database schema with complex entity relationships.
- Implemented data ingestion pipeline handling large-scale data feeds.

EDUCATION & CERTIFICATIONS

BTech in Information Technology | CGPA: 8.30 / 10.0 (2022 - 2026)

C. Abdul Hakeem College of Engineering and Technology, Vellore

Certifications: Python Essentials (Cisco) | SQL for Data Science (UC Davis) | Intro to SE (IBM)
